

CLIMATE RISK ASSESSMENT WORKSHOP

You are cordially invited to participate in this workshop on the assessment of risk and vulnerability of critical infrastructure systems to different climate change scenarios at regional and local levels.

Special guest facilitators from Booz-Allen Hamilton will guide participants through simulated climate scenarios and then lead small groups through a scoring exercise to rate the consequences and likelihood of specific risks occurring.

The outcome of this workshop will be identification of the most vulnerable infrastructure sectors; discussion on issues concern; and evaluation of risk categories.

Space is limited. RSVP to Dale Medearis at dmedearis@novargion.org FREE!!
