### SELECT PUBLICATIONS

- Curts, R. and Campbell D.E. (2015). Cybersecurity requires a clear systems engineering approach as a basis for its cyberstrategy. *Cybersecurity Policies and Strategies for Cyberwarfare Prevention Advances in Information Security, Privacy and Ethics (AISPE) Book Series*. Nantes, France: University of Nantes.
- Curts, R. (2009). Anti-Submarine warfare architecture: DoDaF Views and Related Documentation. Fairfax, VA: ENX Group, INC.
- Curts, R. and Campbell D.E. (2002). Building a Global Information Assurance Program. New York, NY: Auerbach Press.

### Research Focus

The proliferation of Federal law and policy with respect to Information Systems and Security. The result is a number of laws / policies that overlap and are, occasionally, contradictory. Additionally, there are many Federal agencies with overlapping and sometimes conflicting roles and responsibilities. This makes it difficult for practitioners to sort through the quagmire of Federal IT Policy.

### Current Projects

- Federal IT Policy Research
- IT Enterprise Architectures
